Real Innovation

Next Payments (Next) pride themselves on bringing solutions to market that differentiate venues and add value for patrons. This is executed through a thoughtfully composed product suite. Next's exclusive Rewards Teller™ is no exception, allowing members to use membership points in lieu of paying in-venue ATM fees.

Members love this software which was successfully trialled in a leading gaming venue with an adoption rate as high as 28 per cent! The patented software is exclusively available on Next ATMs.

Real Benefits

By offering point redemption for in-venue ATM transactions, points will stay in the venue and the redemption churn rate will increase. This will help reduce your venue's unredeemed points liability and encourage patrons to re-invest points back into the venue. The free ATM transaction offer will increase member satisfaction, loyalty, acquisition and retention.

Member's points redeemed for free in-venue ATM transactions

Patented

Exclusively available to Next Payments

Improve your balance sheet by reducing membership points

Keep point redemption in

Offer genuine rewards with tangible, instant benefits

Sophisticated software, yet simple integration and use

Promote loyalty and increase your membership base
