To whom it may concern,

The Next Payments Cash Xpress unit adds efficiencies to the cash out process by the simple remote activation which saves staff having to physically approach the unit to unlock it.

The cash out screen is clear and easy for customers to perform a transactions and cash is dispensed quickly, ensuring a smooth and seamless experience. Moreover, customers appreciate that the cash-out process is now a one step process; and the fact a machine dispenses the cash eliminates human error, reducing shrinkage while increasing staff and patron security.

The machine looks good and runs well. Should a fault occur, all our staff have access to the 24/7 help desk to fix any issues, meaning our customers are never without cash.

We recommend all gaming venues contact Next Payments to secure a new eftpos cash out unit.

Yours sincerely,
