

Temperature Kiosk with QR Code for Contact Tracing

Keep staff and visitors safe with automatic and contactless temperature checking and QR code for contact tracing.

CONTACTLESS & AUTOMATIC

- ⌚ Automatically streamline your traffic with swift and accurate temperature reads.
- ⌚ Remove any risk with a zero-contact process.

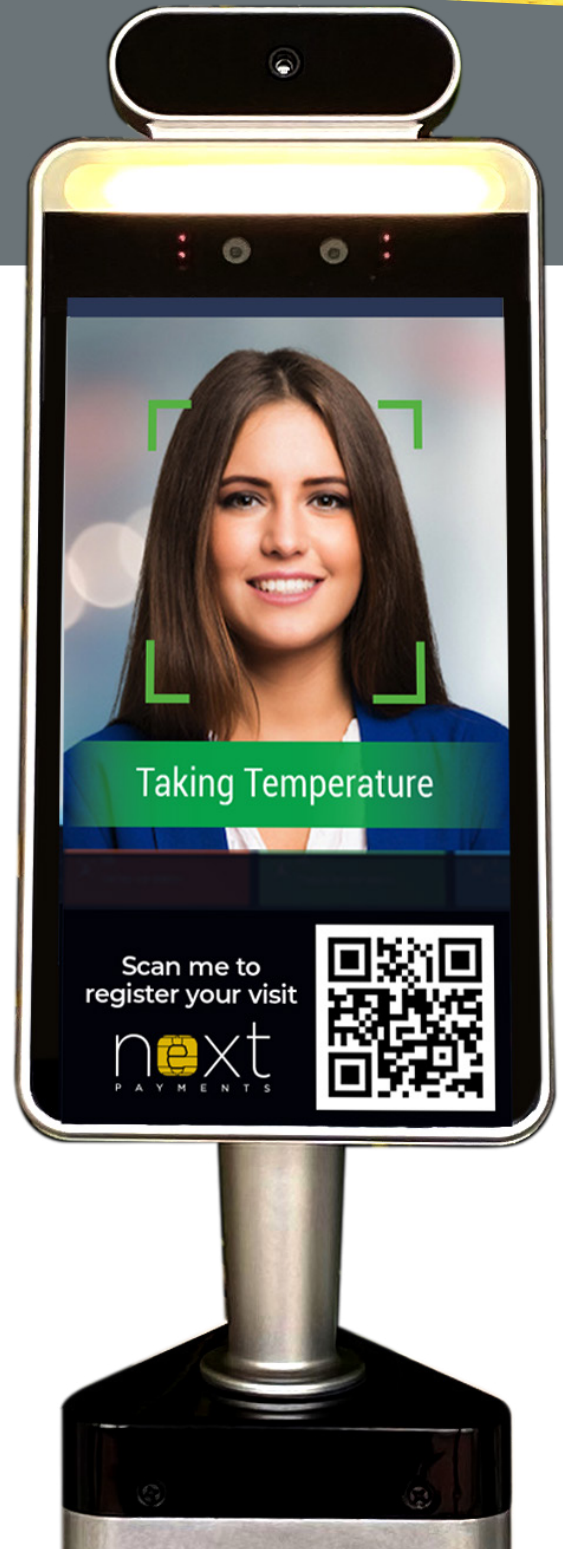

STAFF FACIAL RECOGNITION

- ⌚ Have confidence that all your staff are healthy whilst also managing clock-in/out times with facial recognition software.

REPORTS & AUDITING

- ⌚ Provides easily accessible reports for government compliance contact tracing audits.

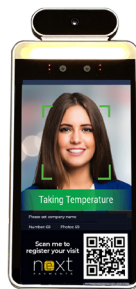

MANAGEMENT SYSTEM

- ③ Centralise your information into a simple and easy to use management system.
- ③ Evaluate the volume of your traffic and get real time monitoring.
- ③ Easily access the history of all your temperature reads and get full reporting.

KEY FEATURES

A unique QR code for visitors allows them to quickly scan your QR code and enter their contact details without a single touch to the kiosk.

Get quick notifications of entry refusals with a warning voice, light signals and email alerts.

Instantaneously read an accurate temperature whilst keeping a safe distance.

Wirelessly connect to the Management System and integrate multiple kiosks at different entrances.

SUITABLE FOR ALL BUSINESSES AND OFFICES

The kiosk is quick and impressive giving us the ability to temperate check all clients without our staff coming in close contact. Plus we can trace clients if required. We feel that temperature kiosks will be the norm in the future and the Next Payments models makes this unintrusive and effective.
